

# Jewelers Miter Jig

by Pepetools

## To use the Pepetools Jewelers Miter Jig:

- Select the Angle you wish to use.
- Loosen the Tightening Nuts on the top of the unit and slide your selected angle open by pushing towards the top of the unit.
- If you wish to repeat a cut multiple times place the Stop Bar(s) into their holes with the bend at the appropriate distance for the cut you intend to make.
- Insert the metal you wish to cut, use the Universal Holders if cutting wire or tubing.
- Close the jig down on the piece you are cutting and tighten the nuts.
- Cut against the jig with a jewelers saw and/or file for a perfect angle every time.
